• Projects

Sudoku Solver | Java, Maven, Jframe

<https://github.com/JagritiR/SudokuSolve>

Used Java SE 8 to develop the application. Used Swing for the graphical user interface.

Implemented a recursive backtracking algorithm to find a valid solution for the sudoku grid. Tested the application using JUnit and various sudoku puzzles with different difficulty levels. Developed a fully functional sudoku solver that can solve any 9x9 sudoku puzzle with optimal time. Enhanced my skills and knowledge in Java development, especially in data structures, algorithms and GUI design.
